EDUCATION

Institute of Engineering and Technology, Devi Ahilya Vishwavidyalaya	Indore, India
<i>Bachelor of Technology - Information Technology; CGPA: 8.4 — Current SGPA: 8.86</i>	2024 - 2028
<i>Courses: Data Structures, Analysis and Design of Algorithms, Artificial Intelligence, Machine Learning, Computer Networks, Databases</i>	

SKILLS SUMMARY

• Languages:	Python, Java, JavaScript, C++, C, SQL
• Automation & API Integration:	Requests, smtplib (Email Automation)
• Data Analysis:	Pandas, NumPy, Matplotlib, Seaborn, Plotly
• Web Technologies:	HTML, CSS, Bootstrap, Tailwind CSS, REST APIs, Flask, Jinja2, Routing, Authentication (Flask), Node.js, Express.js, MongoDB, React
• Databases:	SQLite, PostgreSQL
• Tools:	Git (Version Control), GitHub, Docker, Command Line/Terminal

PROJECTS

ExamGPT – RAG-Powered Exam Preparation Assistant (Team Project)	2026
<i>Python, Streamlit, ChromaDB, Google Gemini API, HuggingFace Sentence-Transformers, React</i>	
• Retrieval-Augmented Generation: Built a RAG pipeline that answers questions strictly from a student's own uploaded notes and previous-year question papers (PYQs), grounding every response in the source documents to eliminate hallucination.	
• Source Citations: Implemented exact page-level citations (file name and page number) for every generated answer, allowing students to independently verify information.	
• PYQ-Aware Detection: Designed an automated system that flags topics appearing across multiple years of past papers as high-frequency, helping students prioritise high-yield revision.	
• Deployment: Deployed the main application on Streamlit Community Cloud and a dedicated React landing page on Vercel for public accessibility.	
• Password Manager (Python, JSON, Tkinter): Built a desktop application for secure local credential storage with encrypted JSON persistence, random password generation, and clipboard-copy functionality. (2025)	
• Flashcard Language Learning App (Python, Pandas, Tkinter): Developed an interactive flashcard application with automated card generation from CSV datasets, spaced-repetition logic, and persistent progress tracking. (2025)	
• Pomodoro Timer (Python, Tkinter): Created a productivity timer implementing the Pomodoro Technique with configurable work and break intervals and a visual session counter. (2025)	
• Blog Website (Flask, Bootstrap, HTML/CSS): Built a full-stack blogging platform with post creation and display functionality. (2026)	
• Additional Python Projects (Python, Pandas, OOP, API Integration): Snake Game, Pong Game, Quiz Application, and Quote Generator – demonstrating OOP design, API consumption, exception handling, and data manipulation with Pandas.	

CERTIFICATIONS & PROGRAMS

IBM SkillsBuild Academic Internship Program – Generative AI & Cloud Computing Track	Virtual
<i>6-week virtual internship, conducted via CSRBOX Bharatcares</i>	2026
Enginow Open Source Program (OSP)	
<i>Open Source Contributor</i>	2026
100 Days of Python Bootcamp – Udemy	Online
<i>Comprehensive Python bootcamp covering automation, web development, and data analysis</i>	

ACHIEVEMENTS AND EXTRACURRICULAR ACTIVITIES

• Actively strengthening problem-solving ability through consistent Data Structures & Algorithms practice, with regular problem-solving on LeetCode.
• Participated in Smart India Hackathon (SIH) 2025 – collaborated in a team to design a Smart Traffic Management System addressing real-world urban mobility challenges.
• Competed in Code Quest coding competition organised by Google Developer Groups on Campus (GDGoC), IET DAVV.
• Member of Google Developer Groups on Campus (GDGoC), IET DAVV and Engineers Without Borders (EWB).
